AlWATANIYA

SINCE 1988

Who are we

Al-Wataniya is a pioneer in the fiberglass and plastics industries in the Gulf Region. Established in 1988, Al Wataniya was the first manufacturer in the fiberglass industry to embrace modern machinery over conventional manual methods.

Today, Al Wataniya is a leader in the fiberglass and plastic industries with an active commercial presence in the market, most importantly in the Gulf markets and the Middle East.

In achieving the vision of adhering to the highest standards of quality and price, along with the efforts of our workforce, Al Wataniya offers a broad range of plastic products and fiberglass, with more than 115 products.

What are our products

Our products and production lines vary according to our client's sectors. Al Wataniya is the leading company in water reservoirs ;thus we received a number of International Quality Certificates.

We, due to our experience, are one of the most important suppliers of the local market for fiberglass products such as water treatment tanks, fiberglass poles, and sunshades approved by the State's ministries.

Our heavy products include mobile rooms and luxury trailers, while the light products vary like sports club chairs, plastic benches, and portable toilets whose designs vary according to the wishes of our customers.

We are proud of our engineers, who brought us to lead in many of the engineering and entertainment facilities for the past thirty years.

We look forward to providing the highest quality standards, diversify our products, and make the utmost efforts to satisfy our customers.

Years of Success

Al Wataniya was established in 1988 to satisfy the need of kuwaiti market. Gradually our activities have extened to include neighboring markets such as Iraq, Kingdom of Saudi Arabia, and Qatar.

Of the Main Projects

Coverage of wastewater treatment basin

-Ministry of Public Works

Fish and shrimp ponds for aquaculture program

-Kuwait Institute for Scientific Research

Sunshades, fiberglass works, and water tanks

-Public Authority for Housing Welfare

Polyethylene drinking water tanks

-Ministry of Awqaf & Islamic Affairs

Fiberglass Seats and General Fiberglass Works

-Ministry of Education

Underground burial tanks for petrochemicals

-Oil Industries in Kuwait

Leadership

Leadership in the industrial systems and procedures for quality assurance is our vision for the design and production of high-quality polyethylene drinking water tanks that conform to the international health standards approved by all ministries in the State of Kuwait.

Guarantee

We guarantee you that Polyethylene used in manufacturing drinking water tanks is approved and certified to have the highest specifications and sanitary standards.

Latest international manufacturing techniques are used in the production of water tanks, which gives the tank more strength and durability.

Innovation

Innovation and excellence in the design and production of polyethylene water tanks to produce the best and satisfy our customers.

The water tanks come in three different models, which include vertical, horizontal and short, and are available in different sizes that start from 250 gallons.

Excellence

Al Wataniya polyethylene water tanks are featured with several characteristics such as:

Copper connections with high-quality external thread to maintain the quality of water conservation and to protect the body of the tank from damage.

The covers are designed as internal thread, with external thread for the tank's neck to have total closure against the wind as well as to prevent the entry of dust.

Diversity in the layers provided to suit the needs of customers from two up to four layers.

Specialized underground tanks

Al Wataniya has an experience of over three decades in the design and production of fiberglass specialized tanks with the highest standards of quality and durability approved for safe underground burial.

The tank components vary according to the type of material stored in the tank. For instance, petroleum products with high sulfur concentrations require different components than a reservoir that stores wastewater.

Specialized burial tanks are available in all sizes and measurements to suit the requirements of the projects.

GRP Water Tanks

GRP tanks are water tanks with large capacities that can reach up to three hundred thousand gallons.
The tank consists of a set of GRP parts manufactured with the latest systems and machines in the form of high pressure and heating simultaneously to ensure the strength and durability of the pieces with special external reinforcements to ensure the quality of storage.

With more than a quarter century of experience in the construction of GRP tanks, we have committed to provide the highest health standards by adopting a unique interior architecture for the tank free from any internal supports or metal joints that touch the water in order to maintain the quality of storage and ensure a longer life span of the tank.

Mobile Rooms

Fiberglass mobile rooms are a practical and economical solution for multi-use and portable rooms.

They are versatile and available in different sizes to suit all needs and are equipped with all the necessary basic supplies.

Thermally-insulated, fully protected against severe weather conditions, and have solid steel bases for the ease of transportation.

Mobile Toilets

Al Wataniya portable toilets are the smart and ideal solution for temporary work areas such as oil projects, contracting, in addition to entertainment facilities such as camping areas, since they are easy to store and transport.

Special applications

Individual applications are offered according to the requirements of the customer such as toilets with high specifications for oil installations as well as toilets that contain shower rooms for military installations.

Memorial Monuments

One of the fiberglass projects in the State of Kuwait is the memorial figures for a number of sites:

In celebration of the 50th anniversary of Kuwait University establishment, the hemisphere monument was constructed and placed at the University's main entrance.

The clock tower in Al Yarmouk area and Al Ahmadi area.

The historical monument of the sheikhs in the roundabout of Al Salmiya area.

Concrete casting slabs and waffle

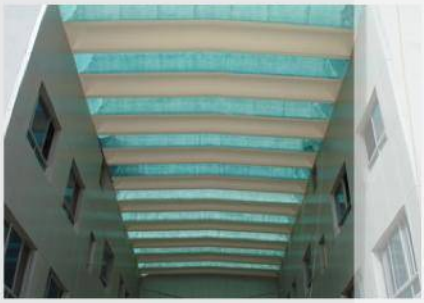
Al Wataniya has a distinctive footprint in the new infrastructure projects of the State of Kuwait, including the implementation of concrete slabs to the new Jahra Bridge project as well as the contribution in making the concrete casting waffle to many projects for the Ministry of Public Works.

Entertainment Facilities

Al Wataniya provides a plethora of entertainment products such as beach resort seat, open playground shades, cartoon figures, and other products for water sports activities.

Special Covers

Under the supervision and implementation of our specialized engineers, covers for sewage treatment basins and other material basins are approved by the Ministry of Public Works for several projects of the State of Kuwait.



Commercial Complexes Shades

Fiberglass shades for several commercial complexes and open areas with unique designs and specifications to provide the modern facilities creativity and excellence.

Implementation and maintenance of marine anchors

With experience in marine anchors engineering and plastic industries, we always seek to support and develop marine activity through the implementation and maintenance of marine anchors.

Fast food delivery boxes

Al Wataniya produces delivery boxes for motorcycles with customized designs that are thermally insulated and fully protected against various weather

Water coolers

Designs for Sabeel water coolers are inspired by our Arab heritage. Al Wataniya can provide specially designed water coolers for companies, institutions, and individual customers.

Evaporative cooler

Al Wataniya Evaporative cooler are manufactured with high quality using water cooling technology that is capable of cooling large areas efficiently.

Fiberglass water tanks

Along the 30 years of leadership and continuous production, fiberglass tanks gained the trust of our customers for their high quality and excellence in design.

Platform Shades

One of our projects in this field is the platform shading of Saad Al-Abdullah Academy for Security Sciences.

Cars Parking shades

Al Wataniya fiberglass car shades are precisely designed inconsistency with the design of the facility. Of our distinctive projects in this field is providing the car shades for the parking lot of Kuwait Grand Mosque.

Fiberglass domes

Fiberglass domes are one of our leading products and are a smart solution for many projects.
The domes come in different designs, dimensions, and specifications for light transmittance and thermal insulation.

Fiberglass Crescents

Fiberglass crescents for mosques add beauty to the facility. The crescents can come in different sizes. Also, it is possible to design and produce other aesthetic formations of fiberglass upon request.

Bus Waiting Seats

Waiting seats are customized for customers of the transport companies with designs that represent the identity of the areas and governorates of the State.

Sports Club Seats

One of Al Wataniya's distinguished projects was equipping the stadiums of seven Kuwaiti sports clubs with fiberglass seats for the players and their audience.
